Dataweigh™ SNACK VERSION

The food industry has been driven by its own specific requirements for high speed weighing performance and as the fastest developing food sector, that demand is set to increase. In accelerating the drive for higher line speeds, Yamato has taken its extensive, well-proven multihead technology to provide tailored fast weighing system without compromising complete accuracy whilst ensuring long-term reliability and customer support.

E xcellent Hygiene

All operating systems, including the radial feeders are totally enclosed to provide superior hygiene. And, all product contact surfaces are removable without tools and feeder trays and buckets are fully interchangeable.

D rive System

Dataweigh™ uses accurate and repeatable stepper motors for bucket door actuation. Motor patterns are adjustable and programmable to ensure the highest speed and efficiency for a wide variety of products.

S pring-less Radius Corner Bucket

All bucket doors are driven by stepper motor without external springs. The stepper motor adjusts the action of the door quick or slow to meet the situation of the products character or the target weight. Since spring-free bucket reduces seasoning dust accumulation, it avoids the fault caused by dust penetration and clears the sanitary problem.

I ndividual Type Collating Chutes for ADW-A-0328SN

The Individual Type Collating Chutes are correctly set to aim the center point. The dumped products travel the same distance from any position of the bucket. The Individual Type Collating Chutes prevent the products from rotating on the chutes. The dumped products straightly slide down on the chutes surface in a moment.

B asic Features

- Reduces power consumption by up to 60 per cent
- Ensures a continuous and optimum product feeding
- Advanced maintenance concept to minimize downtime
- Features auto-tuning and automatic feeding control
- 10.4" color touch screen monitor for intelligent and user-friendly interface

ADW-A-0314S

The steep Collating Chute enables high-speed single discharge up to 140 weighs per minute. A proven and trusted design backed by a number of machines in the field.

ADW-A-0316MN

The stable discharge with 100 weighs for two single tubes. The dedicated Duck Mouth Collection Bucket works for optimum feeding into VFFS machines. The Diverter Infeed Funnel is incorporated as standard.

ADW-A-0328SN

Yamato presents a new solutions with the 28 head twin weigher which features new feeding control to increase accuracy and while reducing power consumption. Enhances productivity with two high-speed single tubes. The twin configurations of two high-speed VFFS machines for reduced footprint, enhanced performance and increased productivity per available floor space.

S Specifications

| Model | ADW-A-0314S | ADW-A-0316MN | ADW-A-0328SN |
|-------------------------|---------------------------------------|----------------------------|--------------|
| Number of Weigh Head | 14 | 16 (with memory bucket) | 28 |
| Max. Speed | 140 wpm | 2 x 100 wpm | 2 x 140 wpm |
| Max. Combination Volume | 3,000ml | | |
| Weighing Range | 4~500g (0.1g) | | |
| Max. Product's Length | 80mm | | |
| Number of Weigh Head | Stepper Motor Driven | | |
| Controller | RCU-920, 10.4inchi color touch screen | | |
| External Interface | USB, Ethernet, RS-232C | | |
| Operating temperature | -10°C~40°C | | |
| Humidity | 35~85%T (No condensation) | | |
| Net Weight | 350kg | 890kg | 1,240kg |

The machines are covered by a number of patent worldwide.
Above specifications and dimensions are subject to change without notice.

Easy Operation

Color Touch Screen Operator Interface

- 10.4 inch color touch screen
- User-friendly icons enables easy operation.
- Up to 300 pre-set programs can be memorized.
- 2 products mixing is available (ADW-A-0320S)

Self-diagnostics

All important system conditions, including voltages, input/output status, software versions, and analog/ digital converter can be monitored and diagnosed through- the color touch screen operator interface.

USB Memory port

- Data acquisition
- Program update

Network Remote Control and Data Acquisition

Network connection capabilities (optional)

- PC remote control by LAN
- Data acquisition via USB, Ethernet or RS232C
- Feed back control between checkweigher and multihead weigher

Production control function

Enter the number of packs you want for a certain recipe and once the production batch reach this number, the scale recipe can be automatically changed to the next one.

About Yamato & Dataweigh™

Yamato Scale Co., Ltd. was founded in 1920 and has always been a leading manufacturer in the world of weighing machinery. In 1979, the first Dataweigh ADW-110 was developed. Since then, we have introduced many groundbreaking technologies, creating today's high-speed and highly accurate multihead weigher 'Dataweigh Series', which is used throughout the world. Our headquarters are in Akashi, Japan, and we have regional offices in the U.S.A., Canada, Germany, Netherlands, U.K., France, Russia, China and India. We also have a joint-venture in Korea and cover more than 70 countries with our representatives. Our highly experienced sales and service network provides customers around the world with a high level of expertise and service.

Worldwide Sales & Service Network

Yamato is the only manufacturer of multihead weighers with wholly owned operations in America, Europe and Asia.

Spare Parts & Service

Yamato Spare Parts and Service are subject to the same high demands of quality as the machines themselves.

Speed, weight and volume listed are standard. Other ranges are also available when required, please contact Yamato. This machine is covered by number of patents worldwide. All illustrations and specifications are subject to change without notice.
